

Akhtar Ali

MERN Stack Developer | Agentic AI Developer

Gulshan-Hadeed, Karachi, Pakistan | akhtardahri945@gmail.com | +92-308-3878494

akhtarali-portfolio-live.vercel.app | github.com/AkhtarAli945 | linkedin.com/in/akhtarali-mern

PROFESSIONAL SUMMARY

MERN Stack Developer with hands-on experience building and deploying production-ready full-stack applications and agentic AI systems. Proficient in React.js, Node.js, Express.js, and MongoDB, with practical experience building multi-agent systems using LangGraph, RAG pipelines, and LLM integrations (Groq Llama 3.3 70B). Experienced in debugging real-world deployment issues across Vercel, Render, and MongoDB Atlas. Seeking full-time Junior Developer opportunities locally and internationally.

TECHNICAL SKILLS

Frontend: React.js, Vite, Tailwind CSS, Context API, React Router

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Socket.IO

Database: MongoDB, MongoDB Atlas, Mongoose, SQL

Agentic AI: LangChain, LangGraph, RAG Pipelines, Groq API, LLMs, Vector Embeddings (@xenova/transformers), n8n, LangSmith

Tools & Deployment: Git, GitHub, Vercel, Render, Cloudinary, Razorpay, Postman

CS Fundamentals: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), System Design Basics

PROJECTS

SupportAI – Multi-Tenant Agentic Customer Support SaaS

Live Demo: supportai-irid.vercel.app | Widget Demo: supportai-widget-demo.vercel.app

- Built a multi-tenant agentic customer support SaaS with a LangGraph-style AI agent pipeline powered by Groq Llama 3.3 70B
- Implemented local RAG (Retrieval-Augmented Generation) using @xenova/transformers for context-aware, low-latency responses without external embedding APIs
- Developed a real-time escalation system with Socket.IO, a React/Vite/Tailwind admin dashboard, and an embeddable vanilla JS chat widget; deployed across three Vercel projects and a Render backend

Tech Stack: React.js, Node.js, Express.js, MongoDB Atlas, Socket.IO, LangGraph, Groq API, RAG, Tailwind CSS

TripMind AI – Multi-Agent AI Travel Planner

Live Demo: tripmind-ai-sigma.vercel.app

- Designed and deployed a multi-agent AI travel planning system using 8 coordinated LangGraph agents powered by Groq Llama 3.3 70B
- Built real-time itinerary updates between frontend and backend using Socket.IO
- Debugged agent routing and state-merging logic across the multi-agent pipeline; migrated backend deployment from Railway to Render for improved stability

Tech Stack: React.js, Node.js, Express.js, LangGraph, Socket.IO, Groq API, MongoDB

Doctor Appointment System – Full-Stack MERN Application

Live Demo: doctor-appointment-system-mu-lemon.vercel.app

- Built a complete full-stack healthcare platform with separate Patient, Doctor, and Admin portals
- Implemented JWT-based authentication with protected routes and role-based access control
- Integrated Cloudinary for profile image uploads and Razorpay for online payments; deployed frontend and admin panel on Vercel with the backend on Render

Tech Stack: React.js, Node.js, Express.js, MongoDB Atlas, Tailwind CSS, Cloudinary, Razorpay, JWT

FREELANCE EXPERIENCE

Freelance Web Developer – Upwork

2025 – Present

- Delivered Framer-based landing pages for international clients with fully responsive layouts
- Handled end-to-end client communication, requirement gathering, revisions, and on-time delivery
- Built client-facing MERN components and REST API integrations for multiple freelance projects

EDUCATION

BS Information Technology – 6th Semester

University of Sindh, Jamshoro – Karachi, Pakistan

ADDITIONAL INFORMATION

- Open to full-time, remote, and international opportunities
- Actively building agentic AI systems (LangGraph multi-agent pipelines, RAG, LangSmith); active in Pakistan developer communities
